

WASTE MANAGEMENT POLICY

Felix O'Hare & Company Ltd understands the importance of waste management and its effect on the environment. The Company is therefore committed to minimizing waste production utilising the waste hierarchy by employing prevention, Re-use, and Recycling techniques at every stage of our operations.

Firstly we aim to reduce the Company's overall consumption and usage of raw materials. Aligned to this we encourage and favour wherever possible, the re-use of materials in all areas of the business. In addition we promote the concept of recycling and the benefits of utilising recycled materials. However when disposal is the only option, we will seek to dispose of materials in an environmentally sensitive and responsible manner. In order to accomplish this aim we:

Develop Site Waste Management Plans (SWMP) for each site in order to accommodate effective waste management and minimise the risk of pollution.

Receive regular reports from Waste Management Companies identifying percentages of wastes recycled from site
